MOBILE AIR CONDITIONERS

Price List

“MONOBLOC” STYLE

These are “spot coolers”. They plug into a standard 13 Amp socket. A flexible air hose transfers the heat from the air conditioner to the outside, via a window left ajar. Therefore, the unit has to be positioned about 1 metre from an opening window. The cooling effect is best felt within, say, a distance of 3metres around the front of the unit.

MODEL	COOLING CAPACITY	PRICE TO BUY EXC VAT	HIRE RATES PER WEEK		
			1-2 weeks	2-4 weeks	over 4 weeks
KY22	2.2KW	HIRE ONLY	£55.00	£50.00	£35.00
BT12000SR	3.5KW	HIRE ONLY	£60.00	£55.00	£40.00
PECB 12F	4.0KW	£599.00	£65.00	£60.00	£45.00
KY41	4.1KW	£599.00	£65.00	£60.00	£45.00

The various models of unit above all employ different methods of disposing of the condensate (water) produced during their operation. Please telephone to discuss your requirements and we can advise on the most suitable for your application.

SALES PRICES INCLUDE OVERNIGHT DELIVERY
DISCOUNTS AVAILABLE FOR MULTIPLE UNITS
DELIVERY & COLLECTION (25 MILE RADIUS) FOR HIRE UNITS £25.00 EACH WAY PER UNIT

25-30 M sq	HIGH WALL MOUNTED	£3,200.00	7.1	8.5

SPECIFICATIONS & GUIDE NOTES

1. Conservatory air conditioning systems are primarily for heating in the winter as they give an excellent alternative to radiators with almost instantaneous independent heating and are energy efficient. As for cooling, no domestic a/c system will be adequate to keep a conservatory cool during peak times (eg 11.00am to 5.00pm) on a sunny day as the structure is more like a greenhouse during these times. However, outside these times the cooling will work effectively and efficiently and we advise clients to keep the a/c off and open doors, windows and roof vents during the hottest part of the day. Other factors affect the cooling/heating requirements, such as which way the conservatory is facing (eg a North facing structure will require more heating in Winter and less cooling in Summer than a South/South West facing conservatory).
2. All above prices are for the supply, basic installation and commissioning.
3. All above prices are for Inverter Technology Heat Pump A/C Units.
4. Maintenance costs typically £60.00 per unit for one service visit per annum, incorporating all features of our standard maintenance agreement (copy available on request). Interim filter cleans will be required by the user. Full details on this are included in the appliance operating manual.
5. Warranty is 3 years parts with parts and labour cover in year 1, subject to correct planned preventative maintenance records.
